

WELCOME  
TO  
THE  
FUTURE  
OF  
COATING  
REMOVAL.

# A POWERFUL PARTNERSHIP OF POSSIBILITIES

RecoverTechnic™ is a joint venture between Kolene® Corporation and ABL-Technic GmbH. These industry leaders have partnered to offer an innovative new coating removal system that is virtually closed loop with minimal vapor loss. It's a superior combination of specialty chemicals and spray equipment that will significantly improve both efficiency and savings for manufacturers in the U.S., Canada and Mexico. This process allows manufacturers to remove coatings from valuable components, recover their products, and recover their costs.

# A TECHNOLOGY TRENDSETTER

RecoverTechnic is backed by the technological expertise of Kolene Corporation, a leader in providing surface cleaning and treatment technologies for components and materials. Kolene's Recover® cleaning processes, utilizing organic cleaning solutions which operate from about 200°F to 300°F, efficiently remove coatings from ferrous alloys (including galvanized steels), pot metals, aluminum, and select non-metallic substrates. They offer significant savings while providing environmentally friendly alternatives to conventional solvents. And, Recover represents a new chapter in stripping and cleaning technology.

## A PROCESS SPACE SETTER

RecoverTechnic customers will benefit from the vast experience of ABL-Technic, internationally known for their expertise in customized coating removal. ALB-Technic is the industry market leader in Germany and operates thirteen facilities around the world. Their research center develops and tests new stripping techniques to keep pace with environmental and performance requirements. Their spray equipment, ChemJet™, helps reduce capital cost and floor space while providing chemical and energy efficiency.

# WORLD-CLASS SERVICE FIRST-CLASS SERVICES

RecoverTechnic provides integrated technical support, combining the capabilities of Engineering, Sales, Technical Service, and Research and Development. Turnkey services include equipment design and installation, chemical sales and new product development, chemical and equipment service, replacement parts, preventive maintenance inspections, training and analytical services. With over 100 years of combined experience, Kolene and ABL-Technic offer a joint venture with full-service capabilities for both domestic and international customers.
